

# MODULAR SOFAS

# NODAL COLLECTION

*by Luca Nichetto*

Responding to the concept of personalized combination, Nodal is a system of sofas whose modularity allows multiple configurations. Starting from a platform with 1, 2 or 3 seats, to which you attach rectangular modules that function as armrests and backrests, you can create any combination, from an independent sofa to benches and more elaborated combinations. The modular platform of the seat allows for the integrated addition of functional extensions, such as tables or joints to create different linear compositions.

The Nodal collection offers interior designers and architects the possibility of making almost any assembly, almost like a Lego set.

# INSULA COLLECTION

*by Patrick Norguet*

This collection is a system of seats and tables that offer a simple and elegant solution for decorating common spaces. The designer, Patrick Norguet, wants the combination of the pieces in this collection to evoke natural landscapes. Much more than a set, Ínsula is first of all a system: it is made up of a basic structure on which the seats, backrests and accessories are fixed. This project is conceived as a set of simple construction and combinations, without forgetting the main function, the comfort of its use. Modular sofa set based of a combination of 2 lengths of seat (short and long) and 3 sizes of back (A, B & C), with different shapes and sizes of tables in different material. Metal legs with epoxy finishing.

*Much more than a set, Insula is first of all a system*
